Summary

A detail-oriented Web Developer with over 1 year of experience in building responsive and user-friendly web applications. Proven track record in developing interactive educational tools and collaborative web apps using HTML, CSS, and JavaScript. Passionate about applying technical skills and analytical problem-solving to deliver high-quality digital solutions in a team environment.

Skills

Technical skills

- Languages: HTML, CSS, JavaScript
- Frameworks: NiceGUI
- Tools & Platforms: GitHub, Slack
- Additional: Database Management, Usability Testing

Social Skills

- Collaboration: Strong teamwork and communication skills.
- Problem-Solving: Analytical approach to technical challenges.
- Organization: Excellent time management and project organization.

Experience

Web Developer | Scribble Works Publishing House |*Present*

- Generated over 60 interactive educational math games tailored for Junior High School (JHS) students.
- Developed games using HTML, CSS, and JavaScript, ensuring they are responsive, intuitive, and user-friendly.
- Conducted rigorous usability testing to optimize the learning experience and interface navigation.

NSS |Food And Drugs Authority | October 2024 - September 2025

- Assisted in the inspection and monitoring of food, drugs, and household chemical products to ensure compliance with safety standards
- Participated in field inspection of production sites, warehouses, and distribution outlets.

Pupil Teacher | Mim Senior High School | October 2023 - May 2024

- coordinated class activities to ensure active teaching and learning
- Encouraged active participation, teamwork, and moral discipline among learners

Projects

- Personal Portfolio

  Designed and developed a personal portfolio website to showcase my professional projects and technical skills. The site serves as a central hub for demonstrating my ability to solve problems and create high-quality digital solutions.

- Medifind

  Created a healthcare platform designed to help patients manage their prescriptions. The site ensures users can find and access the right medications exactly when they need them, improving overall health tracking

- AssignmentX

  Built a gamified learning module to serve as a primary assessment vehicle. Focused on aligning game mechanics with specific educational indicators.

- Advertisement Manager

  Built an advertisement manager app that allows users to easily list, browse, and trade products. The app simplifies the buying and selling process by providing a clear space to showcase items to potential customers.

Education

Bachelor of Arts, Economics Education
University of Education, Winneba, Ghana | *September 2024*
